Subject Index

Abbreviations; PN, parenteral nutrition; TPN Total parenteral nutrition

A

Abstracting of Clinical Nutrition, 113
S-Adenosyl-L-methionine administration, effects on plasma levels of sulphur-containing amino acids in liver cirrhosis of, 309
Adipocytes in gel culture, white, thermogenesis and metabolism of, 53
All-in-one nutrient solution in PN, 39
Alveolar macrophage function following TPN, lung, 269
Amino acids
  in critically ill patients, plasma concentration changes during TPN of, 358
  skeletal muscle metabolism of, in severely traumatized patients, effects of leucine infusion on, 140
  sulphur-containing, in liver cirrhosis, effect of S-adenosyl-L-methionine administration on plasma levels of, 309
Ascorbic acid in TPN mixtures stored in multilayered bag, stability, 284

B

Biliary sludge formation during TPN, therapeutic approaches, 12
Biliopancreatic diversion, intravenous nutritional support in pregnant women following, 106
Bioelectrical impedance (bioimpedance)
  in acutely dehydrated subjects, 128
  dual frequency, in predicting distribution of total body water, 69
Body composition
  analysis: an evaluation of 2 component models/multicomponent models/bedside techniques, 114
  in cerebrovascular accident patients, 18
Bowel (intestine)
  cell proliferation morphology and metabolic function, soy polysaccharide in enteral diet and its effects on, 277
  failure, home PN in management of, report of 400 cases on role of, 331
  small
    effect of glutamine-supplemented TPN on, in septic rats, 207
    plasma and jejunal glutamine levels after resection of, 30
Burned patients, selenium losses in, 75

C

Cachexia, TNF and other cytokines in, 1
Calorie source, water and sodium balance during intravenous refeeding influenced by, 59
Cancer patient, adult, nutritional support, review article, 167
Candida sepsis during TPN, 240
Cardiovascular risk factors in mild hypertension, exercise and gradual (vs abrupt) increases in intake of salt and fatty acids and their effects on, 309
Carnitine deficiency, late onset primary systemic, exacerbated by carnitine-free PN, 368
Catheter
  occlusion, ethanol flush for prevention of, 97
  venous, *see* Venous access catheter
Cerebrovascular accident, resting energy expenditure and body composition following, 18
Cholesterol homeostasis, effects of intravenous lipid emulsions on, 48
Cirrhosis, liver, *see* Liver
Critically ill patients, plasma amino acids concentration changes during TPN in, 358
Crohn's disease patient with high output stoma, liver function tests in, isocaloric feeding and medium chain triglycerides not improving, 158
Cystic fibrosis, plasma insulin-like growth factor determinations in, influence of nutritional and liver status on, 298
Cytokines in cachexia and septic shock, 1

D

Dehydrated subjects, acutely, bioelectrical impedance analysis in, 128
Dietary supplements
  functional condition and clinical outcome measurement with a modified Norton scale and the effects of, 134
  nutrient-dense, effects on total nutritional intake of anorexic patients of, 154

oral, in post-operative patients, short term benefits of, 337
Dopamine infusion, gastric pressure response to low dose, 23
Drug carriers, model, particle size/surface hydrophobicity/interaction with serum of, as parameters of RES uptake, 289
Dual frequency bioimpedance in predicting distribution of total body water, 69

E

Embolisation, catheter fracture and, in totally implanted venous access catheter following shoulder trauma, 315
Energy
metabolism, in skeletal muscle of severely traumatized patients, effects of leucine infusion on, 140
resting expenditure, following cerebrovascular accident, 18
Enteral formulae/diet
fibre in, effects on zinc and folic acid absorption, 35
soy polysaccharide in, *see* Soy fibre
Enteral tube feeding, mechanical complications of, 87, *see also* Nasogastric feeding tube
Erythrocytes
membrane lipid composition, single intravenous infusion of lipid emulsions and their effects on, 255
polyunsaturated fatty acid composition, essential fatty acid contents of lipid emulsions and their effects on, in long-term PN, 262
Espen Research Fellow Symposium, papers presented at, 45, 48, 53, 56, 59
Ethanol flush for prevention of catheter occlusion, 97
Exercise and gradual (vs abrupt) increases in fatty acid and salt intake in mild hypertension, cardiovascular risk factors and the effects of, 309
Extracellular fluid expansion during parenteral refeeding, 63

F

Fat, diet low in lactose and, diarrhoea during pelvic radiotherapy and the influence of a, 147
Fat emulsions, *see* Lipid emulsions
Fatty acid(s)
exercise and gradual (vs abrupt) increases in intake of salt and, in mild hypertension, cardiovascular risk factors and the effects of, 309
polyunsaturated, erythrocyte, essential fatty acid contents of lipid emulsions and their effects on, in long-term PN, 262
Fibre in enteral formulae, effects on zinc and folic acid absorption, 35
Fluid, extracellular, expansion during parenteral refeeding, 63
Folic acid absorption, effects of soy versus sugar-beet fibre in enteral formulae on, 35
Food and health in Renaissance Europe, 244

G

Gallstone formation during TPN, therapeutic approaches, 12
Gastric pressure response to low dose dopamine infusion, 23
Glutamine
plasma and jejunal, levels after small bowel resection, 30
skeletal sarcolemmal transport, 56
TPN supplemented with, effect on small bowel of, in septic rats, 207
Great Britain, artificial nutritional support in hospitals in – 1991: Second national survey, 187

H

Haematological disorders following TPN, 269
Health and food in Renaissance Europe, 244
Hepatic medicine, *see* Liver
Home PN/intravenous therapy
in intestinal failure management, case report on role of, 331
jejunostomy patient liberated from, 101
long term, subcutaneous venous access for, 93
Hospitals in UK, artificial nutritional support in: Second national survey (1991), 187
Hypertension, exercise and gradual (vs abrupt) increases in fatty acid and salt intake in mild, cardiovascular risk factors and the effects of, 309

I

IGF-1, *see* Insulin-like growth factor-1
Indexing of Clinical Nutrition, 113
Insulin-like growth factor-1
in cystic fibrosis, plasma determinations, influence of nutritional and liver status on, 298
deficiency in multiple trauma victims, acute, 352
Intestine, *see* Bowel
Intravenous therapy, *see* Parenteral nutrition

Isocaloric feeding and medium chain triglycerides failing to improve liver function tests in Crohn's disease patient with a high output stoma, 158

J

Jejunostomy patient liberated from home parenteral intravenous therapy, 101

L

Lactose and fat, diet low in, diarrhoea during pelvic radiotherapy and the influence of a, 147
Leucine infusion, effects on amino acid and energy metabolism in skeletal muscle of, in severely traumatized patients, 140
Lipid, erythrocyte membrane, single intravenous infusion of phospholipid-triacylglycerol emulsions and its effects on, 255
Lipid emulsions (fat emulsions), intravenous infusion/parenteral
  cholesterol homeostasis and the effects of, 48
  erythrocytes and the effects of, *see* Erythrocytes
  in liver cirrhosis patient, metabolic responses to, 193
  particle size/surface hydrophobicity/interaction with serum of, as parameters of RES uptake, 289
  stability, evaluation of microscopic and light scattering methods of determining, 223
Liver
  cirrhosis
    lipid infusions in patients with, metabolic responses to, 193
    sulphur-containing amino acids in, effect of S-adenosyl-L-methionine administration on plasma levels of, 309
  functional tests, in Crohn's disease patient with high output stoma not improved by isocaloric feeding and medium chain triglycerides, 158
  status, plasma insulin-like growth factor determinations in cystic fibrosis and the influence of, 298
Lung alveolar macrophage function following TPN, 269

M

Macrophage, lung alveolar, function following TPN, 269
Muscle
  nutrient utilisation in, with TPN, 345
  skeletal, *see* Skeletal muscle

N

Nasogastric feeding tube, new self-propelling, 373, *see also* Enteral tube feeding
Neonates, central venous catheter use, 365
Norton scale, effects of dietary supplement on functional condition and clinical outcome measured with a modified, 134
Nutrient, utilisation in muscle and whole body with TPN, 345
Nutrient-dense supplement, effects on total nutritional intake of anorexic patients, 154

O

Oral dietary supplement in post-operative patients, short term benefits of, 337

P

Pancreatitis, vitamin status in acute, 83
Parenteral nutrition, 237, *see also specific methods/routes*
  all-in-one nutrient solution in, 39
  carnitine-free, late onset primary systemic carnitine deficiency exacerbated by, 368
  home, *see* Home PN
  lipid emulsions, *see* Lipid emulsions
  in pregnant women with biliopancreatic diversion, 106
  refeeding via
    calorie source influencing water and sodium balance during, 59
    extracellular fluid expansion during, 63
  total
    amino acids concentration changes in critically ill patients during, plasma, 358
    ascorbic acid in, stored in multilayered bag, stability, 284
    biliary sludge and gallstone formation during, therapeutic approaches, 12
    candida sepsis during, 240
    glutamine-supplemented, effect on small bowel of, in septic rats, 207
    lung alveolar macrophage function following, 269
    nutrient utilisation in muscle and whole body with, 345
Pelvic radiotherapy, influence of low fat/low lactose diet on diarrhoea during, 147
Perioperative nutritional support, randomised clinical trial, 180
Phospholipid-triacylglycerol emulsions, single intravenous infusion of, erythrocyte membrane lipid and the effects of, 255

Polyunsaturated fatty acid composition of erythrocytes, essential fatty acid contents of lipid emulsions and their effects on, in long-term PN, 262
Postoperative oral dietary supplements, short term benefits of, 337
Pregnant women with biliopancreatic diversion, intravenous nutritional support, 106
Pulmonary alveolar macrophage function following TPN, 269

R

Radiotherapy, pelvic, influence of low fat/low lactose diet on diarrhoea during, 147
Red cells, *see* Erythrocytes
Reticuloendothelial system uptake, particle size/surface hydrophobicity/interaction with serum of parenteral lipid emulsions and model drug carriers as parameters of, 289

S

Sarcolemma, glutamine uptake across skeletal, 56
Sepsis
  candida, during TPN, 240
  small bowel and the effects of glutamine-supplemented TPN in, 207
Septic shock, TNF and other cytokines in, 1
Shock, septic, TNF and other cytokines in, 1
Shoulder trauma, catheter fracture and embolisation with totally implanted venous access catheter following, 315
Skeletal muscle
  amino acid and energy metabolism in severely traumatized patients, effects of leucine infusion on, 140
  nutrient utilisation in, in TPN, 345
  sarcolemma, glutamine uptake across, 56
Sludge, biliary, formation during TPN, therapeutic approaches, 12
Small bowel, *see* Bowel
Sodium balance during intravenous refeeding, influence of calorie source on, 59
Soy fibre (soy polysaccharide) in enteral formulae/diet
  intestinal cell proliferation morphology and metabolic function and the effects of, 277
  sugar-beet fibre vs, effects on zinc and folic acid absorption of, 35
Stoma, high output, Crohn's disease patient with, isocaloric feeding and medium chain triglycerides not improving liver function tests in, 158
Sugar-beet versus soy fibre in enteral formulae, effects on zinc and folic acid absorption, 35
Sulphur-containing amino acids in liver cirrhosis, effect of S-adenosyl-L-methionine administration on plasma levels of, 309
Surgical patients
  nutritional support, randomised clinical trial, 180
  oral dietary supplements in postoperative, short term benefits of, 337

T

Thermogenesis in white adipocytes in gel culture, 53
Total parenteral nutrition, *see* Parenteral nutrition
Trauma
  multiple, IGF-1 deficiency in victims of, 352
  severe, effects on amino acid and energy metabolism in skeletal muscle of leucine infusion in, 140
  shoulder, catheter fracture and embolisation with totaly implanted venous access catheter following, 315
Triglycerides, medium chain, isocaloric feeding and, liver function tests in Crohn's disease patient with high output stoma not improved by, 158
Tube feeding, *see* Enteral tube feeding; Nasogastric feeding tube
Tumour necrosis factor in cachexia and septic shock, 1

U

United Kingdom, artificial nutritional support in hospitals in – 1991; Second national survey, 187

V

Venous access, subcutaneous, long term home PN, 93
Venous access catheter
  central, for neonatal use, 365
  fracture and embolisation with totally implanted, following shoulder trauma, 315
Vitamin(s), status in acute pancreatitis, 83
Vitamin C (ascorbic acid) in TPN mixtures stored in multilayered bag, stability, 284

W

Water, (body), *see also* Fluid
  balance during intravenous refeeding, influence of calories source on, 59
  bioelectrical impedance studies of, *see* Bioelectrical impedance

Z

Zinc absorption, effects of soy versus sugar-beet fibre in enteral formulae on, 35
